

Analytics report for suppliers (1/3) - Overview

Clusterization of demographic and psychographic data enables SenseBox to improve their understanding of their client base

Analytics report for suppliers (2/3) - Personas

SenseBox has 3 types of customers with varying ages, make-up expertise, styles and hobbies

Analytics report for suppliers (3/3) - Metrics

Evaluating the product metrics for each persona/cluster improves SenseBox's value proposition to its suppliers

3-cluster analysis

3 clusters	Brand Awareness			Brand Trial		
	Before	After	Increase	Before	After	Increase
Young - high like - high expert	29%	100%	3.4x	3%	100%	36.2x
Middle - low like - low expert	18%	100%	5.5x	2%	100%	43.7x
Old - high like - middle expert	23%	100%	4.3x	0%	100%	

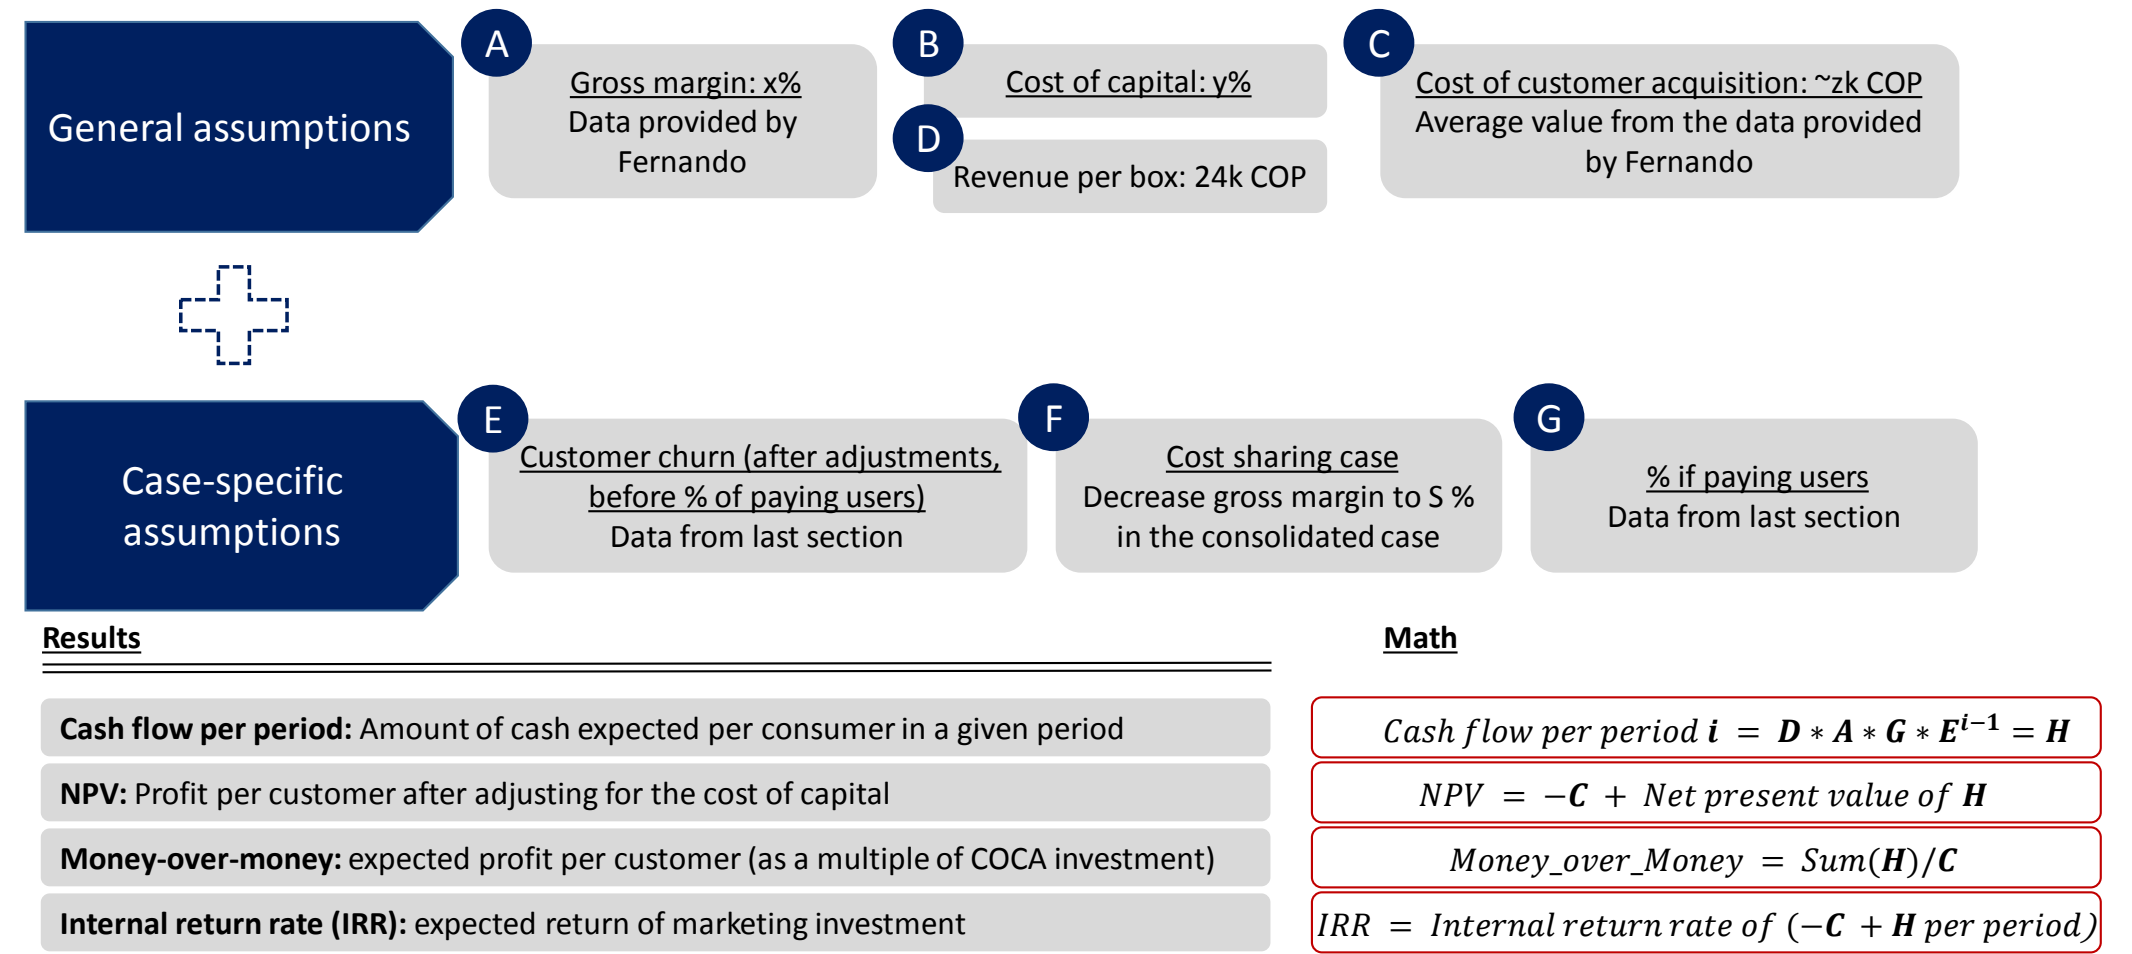

3 clusters	Product Awareness			Product Trial		
	Before	After	Increase	Before	After	Increase
Young - high like - high expert	46%	100%	2.2x	6%	100%	16.1x
Middle - low like - low expert	40%	100%	2.5x	2%	100%	40.3x
Old - high like - middle expert	37%	100%	2.7x	2%	100%	41.0x

3 clusters	Satisfaction		
	Promoters	Detractors	NPS
Young - high like - high expert	43%	22%	21
Middle - low like - low expert	48%	20%	27
Old - high like - middle expert	38%	34%	4

- Findings**
- Low general brand awareness and middle/high product awareness
May indicate that products do not value the brand and buy the product for its price
 - Middle cluster has the least awareness but the highest ratio of promoters and NPS
Target advertisement strategies should be more profitable if focused on this persona/cluster
 - Old cluster has the highest number of detractors and lowest NPS
Target advertisement strategies should avoid this persona/cluster

Financials - Customer lifetime value

Calculating the Customer LTV will help SenseBox optimize its marketing and investment strategies

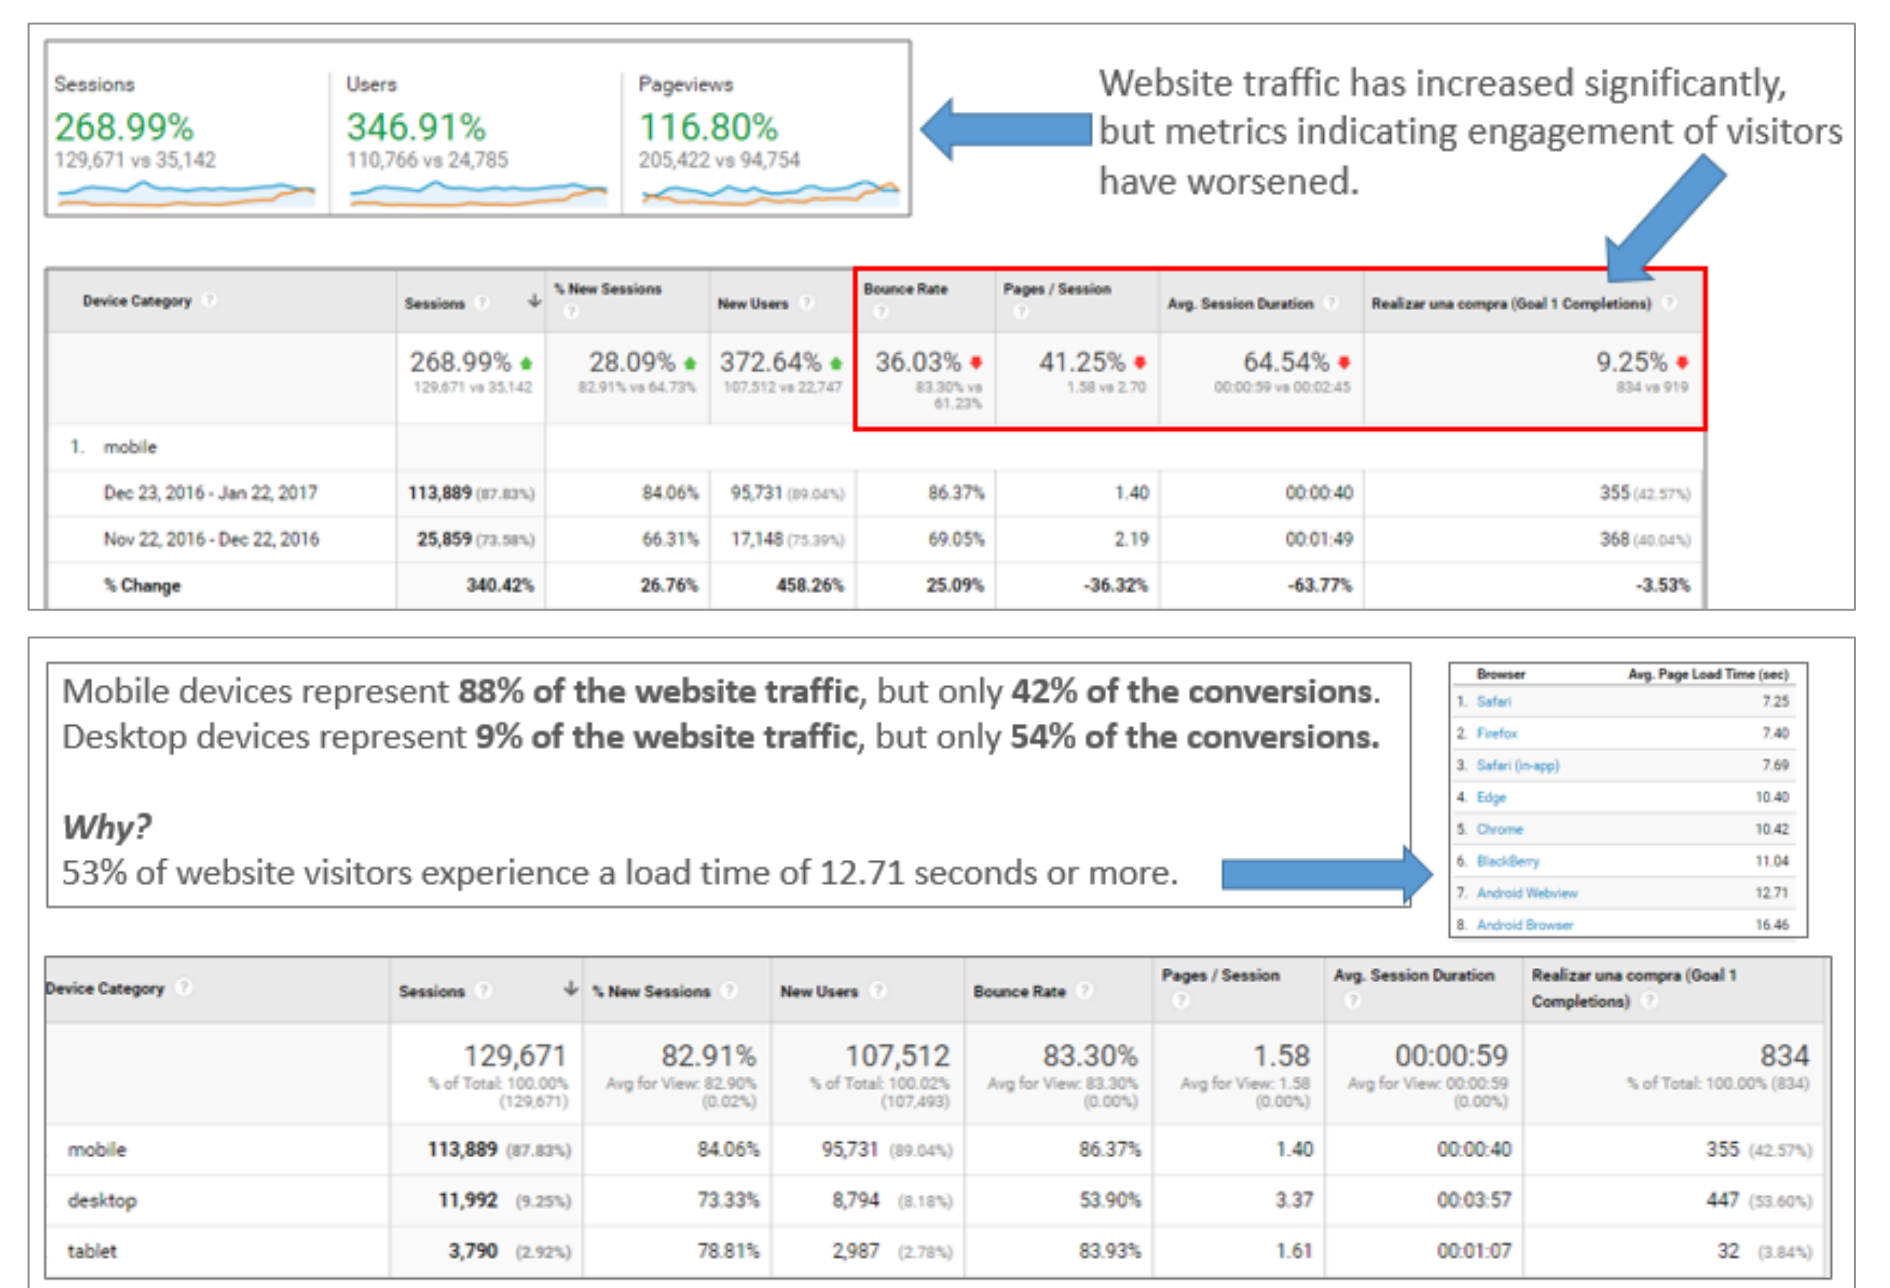

IT systems

IT systems applicable to SenseBox's business model were recommended; a CRM and ERP platform were set up.

CRM	ERP	Customer support	Billing & Payment support
 <p>A CRM platform is the number one priority. Insightly was chosen due to its easiness to set-up and pricing options.</p> <p>Updating all information to Insightly (customers, employees, partners, organizations, products, past boxes) is critical and needs to be done ASAP.</p>	 <p>Using an ERP system is the second priority. It will be very helpful in organizing logistics and prove integral once SenseBox increases its customer base and/or launches additional initiatives.</p> <p>ERP can integrate with Insightly through Zapier or direct integration.</p>	 <p>SupportBee is a customer service platform that integrates well with Insightly. It is recommended at a later stage when SenseBox has acquired a larger customer base. At the moment, Insightly notes will be able to accommodate customer service possibly. If this proves too much of a hustle, SupportBee might be worth the investment.</p>	 <p>The billing & payment platform might be able to facilitate the billing process and possibly reduce rejected payments associated with insufficient funds. Not all platforms support PayU as a payment gateway and is unclear if they are worth the investment. Further analysis is recommended to evaluate ROI.</p>
